

Kevin,

As you requested, I have tabulated below removal guidelines for PCE which you may consider for your removal action at the PCE site.

10<sup>-4</sup> Region III Risk-based- concentration

|             |           |
|-------------|-----------|
| Residential | 120 mg/kg |
| Industrial  | 530 mg/kg |

Note these values are 100 times the 10<sup>-6</sup> Risk- based- concentrations.

NYSDEC TAGM 1.4 mg/kg (Note this value is based on protection of groundwater criterion)

NYSDEC SCOs

Recently, NYSDEC has developed draft Soil Cleanup Objectives (SCOs) for brownfield Program as follows.

Track 1- unrestricted use SCO 0.75mg/kg

Track 2- Restricted use SCO

|                            |           |
|----------------------------|-----------|
| (a) Restricted residential | 3.5 mg/kg |
| (b) Restricted Commercial  | 25 mg/kg  |
| (c) Restricted Industrial  | 51 mg/kg  |
